Commercial Refrigeration Equipment General Specification

DPD SERIES "DELI/PIZZA" PREP TABLES

The all-purpose "raised rail," Deli/Pizza Prep Table assures that conditions are held below 41°F and above freezing. It eliminates any chance of freezing product with lids/drawers open or closed and prevents unsanitary defrosting associated with cold wall, refrigerated rails.

CABINET CONSTRUCTION

Exterior construction includes heavy-duty stainless steel finish on front, sides, top, door(s) and grille. Insulated lid assemblies are made of matching stainless steel. Cabinet back and bottom are constructed of galvanized steel. Interior liner is made of anodized aluminum for superior resistance to corrosion.

In cabinets with doors and drawers, doors are mounted to face of cabinet on cartridge-style hinges permitting them to self close under their own weight. Hinges also allow doors to stay open 120° and permit easy door removal for service and cleaning if required. A plug-in type vinyl magnetic gasket is attached to each door for positive seal.

Cabinet insulation is CFC and HCFC-free foamed-in-place polyurethane of two-inch minimum thickness. Three-inch casters, 2 with brakes, are standard. Six-inch casters or legs are optional.

Cutting board supplied with cabinet is 19" wide constructed of high-density white polyethylene plastic. It is readily removable for cleaning. Two epoxy-coated steel wire shelves are supplied behind each door as standard. Units will accept pans up to 6" deep. Pans are not included.

DRAWER CONSTRUCTION

Drawer frames are constructed of heavy-duty stainless steel. Telescoping design slides make opening drawers smooth and easy. Heavy duty construction ensures maximum support of stored food products. Slides have locking mechanism to prevent drawers from being pulled off of cabinets. For your convenience, drawers accommodate 6" or 4" deep pans. Heavy-duty pan divider supports are supplied. Foodservice pans for drawers are not included. Snap-type vinyl magnetic gasket is attached to each drawer for positive seal. Drawers extend 23" (when opened).

REFRIGERATION

Systems are designed using CFC and HCFC-free, environment friendly R134a refrigerant. Optimized air circulation inside the cabinets ensure uniform temperature distribution. Slightly over and mostly under pans which are recessed approximately 3" from top of raised rail, and into the cabinet directly. Coils are coated for maximum corrosion protection. Innovative design utilizes automatic condensate removal process.
