

THE TIME & TEMPERATURE COMPANY®

Grill Surface Thermometer

100 to 800°F/40 to 425°C

For anyone who loves to grill, knowing the exact temperature of the grilling surface is a big advantage. CDN presents the new Grill Surface Thermometer (GTS800), designed to sit directly on any cooking surface from the rack of a grill to a frying pan or griddle.

This new model stands out for its large, easy-to-read dial broken down in 10 degree increments to show the exact temperature of the cooking surface itself. A color-coded scale highlights the target temperature indications as an aid to the cook. The 2.25-inch diameter dial is framed by sturdy 304 stainless steel housing.

Shatterproof, the CDN Grill Surface Thermometer is constructed for durability to withstand the high heat conditions ideal for grilling lamb, chicken, beef, shrimp, vegetables and other favorites. It provides accurate measurements between 100 and 800°F/ 40 and 425°C.

Designed for safe and convenient transport even when hot, it features two tabs on the top which can be used to lift and move the unit. The cook can also use a spatula to lift the thermometer from the bottom.

Features

- High heat
- Shatterproof
- Place directly on grill

Specifications

Instrument Range: 100 to 800°F/40 to 425°C
